
Panel (a): markers are the sudden threshold of each trap

Patch field measured in ALPHA: 0.35–2 V/m

ALPHA: sudden

ALPHA: slow

Simulated trap: sudden

Simulated trap: slow

ALPHA, shallow well ($k_2 \approx 10$ V/m^2): 0.11 V/m

ALPHA, 10 V well: 96–155 V/m

Simulated trap ($k_2 = U_0$): 50 V/m
