(a)
simulation
formula, 4Dt
mean squared displacement ⟨|Z|²⟩ (mm²)
time t (ms)
(b)
diffusion relative to white noise, D/D_white
theory
simulation
simulated / theory D
noise correlation time, ω₋τ_s
(c)
Monte Carlo (4000 positrons)
analytic
median:
MC 0.819 ± 0.012
analytic 0.802
probability density
loss time in units of t̄
